

25, WILTON PLACE.  
London S.W.

July 11/75

My dear Gray

In hunting up doubtful  
Cyclanthes, came upon *Blumei*  
*Cotyledon* (*Piper*?) which appears  
to me precisely to agree with your  
*Euphyton setii* and must I suppose  
take precedence - If you object pray  
let me know immediately

I've begun *Dryoniaceae*  
In the ~~outline~~ I find that Bureau and  
Miers between them entirely snuff  
out *Dryonia* etc. and I can't  
stand *D. capitata* *unqui* and *equino-*  
*statis* are put into three different  
genera upon characters which appear  
to me partly putid partly imaginary

and at most specific - As far as I have  
gone I think that *Argemone* after  
many deductions must remain a  
very genus - but I foresee much  
work

I have sent you 5 sheets of genera  
& hope to have a more to send next week  
the printers are now in the press

Yours very truly  
George Bentham
